

8GPLYA

8 mil Glossy Polypropylene Film with Permanent Adhesive Aqueous Inkjet Media for use with dye and pigmented inkjet printers.

PRODUCT DESCRIPTION

8GPLYA is an 8 mil inkjet coated polypropylene film with a permanent adhesive. This glossy polypropylene can be used for short run labels, durable posters, and indoor signage. The aqueous coating makes this compatible with both dye and pigmented inkjet printers. Can be laminated with pressure sensitive laminates to increase durability.

SPECIFICATIONS

Physical Properties*

- **Basis Weight:** 150 gsm
- **Caliper:** 8 mil (total weight with psa)
- **Whiteness:** 85 CIE
- **Opacity:** > 90%
- **Gloss Level:** 90 @60°
- **Flame Rating:** Class B ASTM E-84

*Target Values

Features

- High gloss finish
- Solvent Acrylic Permanent Adhesive
- Economical

Recommended Storage Conditions and Shelf Life

- **Temperature:** 60-86 °F (10-30 °C).
- **Relative Humidity:** 50%.
- **Temperature range:** 70 °F.
- Store in original packaging and plastic bag. Best stored in cool dry area.
- Repack opened rolls when not in use.
- Up to one year at conditions noted above.
- Allow material to stabilize to room conditions 24 hours before use.

Environmental, Health, and Safety

- No Material Safety Data Sheet required.
- Waste not suited for recycling.

Main Applications

- Indoor posters
- Trade show signage
- Short run labels

Printer/Ink Compatibility

8GPLYA is recommended for use with the aqueous pigment and dye printers by Canon, HP, and Epson.

Media Handling

To avoid smudges and marks on your finished 8GPLYA print, we recommend handling the coated surface while wearing cotton gloves. Store unused media in original packaging, vertically.

For best results let media acclimate to printing room conditions for 48 hours before use.

Important

Printer and driver settings need one word: setup to help ensure the best performance. Appropriate ink loads must be set for the ink/prINTER combination being used.

ICC Color Profiles

ICC color profiles will can improve image quality and optimize ink limits for improved dry time, wider color gamut, and more accurate color matching. For Pigmented UV printers you can use the Heavyweight coated paper setting. For dye ink sets you can choose a high quality glossy photographic paper setting.

This information is presented as a general guide and is not a performance guarantee. The user should independently determine prior to use the suitability of the material for the specific purpose.
