

## ADVANCED SOLUTIONS FOR LEGAL

# Track and Control Case Document Expenses for Your Firm

Expenses from printing case documents have gotten out of hand. How can we get these costs under control?

Our office has MFPs, but some staff still send jobs to higher-cost-per-page desktop printers and color printers. How can we limit this inefficient printing?

The entire staff at our firm has access to use the MFP devices. But people are printing without limit or careful thought. Why is no one accountable?

How is firm profitability impacted when staff are not printing cost-efficiently or able to bill document-related expenses back to clients?

How can we accurately track our firm's scanning, printing, copying, and faxing expenses? Can we track costs by client, matter, and sub-matter?

### GET ADVANCED

Whether you run a small practice or work in a large firm or legal department, it's likely you must track expenses for the client cases you are working on and keep costs under control.

Canon imageRUNNER® ADVANCE systems can help your firm save money and increase productivity. Canon cost recovery solutions enable your legal staff to work more efficiently, reduce costs, and ensure clients are billed accurately for document and device-related expenses.

If your firm is already using a cost recovery solution, Canon imageRUNNER ADVANCE systems can integrate with industry-leading applications through embedded cost recovery terminals that leverage the Canon MEAP platform.

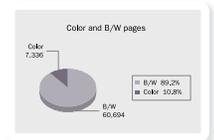

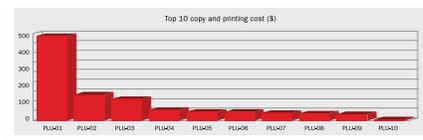

## Monitor, Track, and Bill Back Expenses

Canon provides a full range of cost recovery solutions for practices of all sizes.

These applications provide visibility—for both users and administrators—into document-related costs and where savings can be achieved.

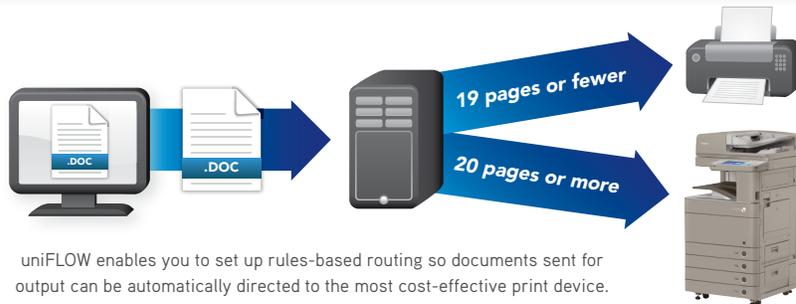

Canon imageRUNNER ADVANCE Tracker helps smaller firms monitor, influence, and reduce wasteful printing and copying.

Both uniFLOW and the imageWARE Enterprise Management Console Accounting Manager Plug-in enable you to accurately track and bill back all device-related costs—and can be broken down by client, matter, and sub-matter.

## Manage and Control Case-Related Costs

Gain comprehensive control over all print usage, even across a large firm. You can limit user access to more costly operations, proactively manage your fleet, and create detailed analytical reports to identify other areas where you can reduce costs.

uniFLOW enables you to set up rules-based routing so documents sent for output can be automatically directed to the most cost-effective print device.

uniFLOW reports provide details that can lead to useful insights into print activity.

## Integrate Devices with Popular Billing Applications

Has your firm already invested in a cost recovery solution?

With embedded applications that leverage the Canon MEAP platform, you can seamlessly connect your devices with Equitrac, Copitrac, and nQueue Billback applications.

Embedded terminals make it easy to track device-related expenses by client, matter, and sub-matter.
